

ANSWER DIGITAL AUTOMATION TEST

Information for Candidate:

The Answer Digital technical task is designed to test your knowledge and approach to a real-life project scenario. You are required to build an automation framework and create tests based on the acceptance criteria below. Please complete the task in either Java or .NET.

The url for this automation test is

<http://automationpractice.com/index.php>

User Stories:

1. As a user if there is an item already inside my basket, I want to be able to delete the item from the basket page so that I can see the basket is empty.

Acceptance Criteria:

- Shopping cart has Delete button
- Item is removed from basket/cart
- Banner must display 'Your shopping cart is empty.'

2. As a user I want to select the 'Summer Dresses' option from the navigation menu, so that I can view an item from the summer collection.

Acceptance Criteria:

- On mouse-hover button 'WOMAN', sub navigation options will appear
- Summer items only display inside the search results

3. As a user when searching for a summer dress, I want to change the price range to \$16 - \$20 so that I see the search results change.

Acceptance Criteria:

- Slider changes the price range
- Search results are updated
- Items returned are within the price range

4. As a user I want to create a new account so that I can start buying items using my personal account.

Acceptance Criteria:

- Form can only accept valid information
- Invalid information will give an error message
- Completing registration will take user to 'MY ACCOUNT' page
- User can see account name on top right

5. As a user when browsing the 'Our stores' page, I want to drag the map to see a store from West Palm Beach, so that I can take a screenshot for future reference.

Acceptance Criteria:

- User can scroll through the map
- West Palm Beach must be within screenshot

Submitting your solution:

Once completing the technical test, **please submit your whole project via a zip file or git repository.**

This so we can look at how candidates have coded their tests and we will be executing them locally to see if they work. You will need to have a framework and working tests with executable code, so we will not be accepting solutions within a word document only.

If you have any questions regarding this technical test please contact your recruiter in the first instance or leed@answerdigital.com if you are a direct applicant.
